

Jiffy Reefing System

A - Jiffy Reef, comes from starboard rope cleat, through deck organizer, mast base block to reef point.

B - Through reef point grommet back down to boom on port side to turning block on front port side of boom.

C- Through various eyes to back of boom to turning block on port side of boom in the back. (see diagram for Topping Lift for that block)

Then up to back reefing point grommet, through it and back down to boom on starboard side. Tie it off. Ease main halyard and pull reefing halyard to reef mainsail. Tie off mainsail around boom with reef point ties. (see diagram of Boom Vang to see reefed mainsail)
