

CONTINUOUS LINE REEFING

INSTRUCTIONS FOR USE

1. Ease the mainsheet to luff the main.
2. Release the halyard to a length equal to the distance from the gooseneck to the desired reef point. (Mark these points for quick reference.)
3. Pull on the reef line led aft until both the clew and tack cringles are drawn down tightly and proper out-haul tension is achieved in the foot.
4. Retension the halyard.
5. Retrim the mainsail as desired.
