### DIMENSIONS

LOA	24' 10-3/4"	Main Sail Area	123 sq. ft.
LWL	20' 2"	100% Foresail Area	157 sq. ft.
Beam	8' 0"	Ballast	1800 lbs.
Draft	3' 11"	Displacement	3850 lbs.

### CONSTRUCTION

- Hull -- Hand laid up molded fiberglass, reinforced in high stress areas.
- Deck -- Hand laid up molded fiberglass with closed cell, vertical grained balsa wood core for reinforcement and insulation. The deck exterior has non-skid surfacing in walking areas.
- Ballast -- Lead keel joined to the hull by strategically arranged, high tensile strength stainless steel bolts.
- Rudder -- Hand laid up fiberglass construction with high density polyurethane core interlocked around and through a specially designed stainless steel post.
- Bulkheads -- Interior panels are plywood with teak overlay. Bulkheads are bonded to the hull and deck to form a unitized structure.

### STANDARD EQUIPMENT

- Mast -- Anodized aluminum 6061-T6 extrusion with integral sail track. Both main and jib halyards are internal with a mast mounted jib halyard winch and two halyard cleats.
- Mast Step -- Stainless steel with pivot for easy raising and lowering of mast.
- Spreader -- Anodized aluminum with stainless steel base.
- Mast Steaming Light -- Complying with Coast Guard lighting requirements.

Main & Jib Halyards -- Stainless steel wire with dacron rope tails.

Boom -- Anodized aluminum extrusion with integral groove for sail and downhaul cleat.

Main & Jib Sheeting -- Sheets are braided dacron.

Rigging -- 1 x 19 stainless steel with swaged terminals and bronze turnbuckles with toggles.

Traveler -- Mainsheet traveler has individual stops.

Jib sheeting -- Snap shackle blocks attach to gunnel rails.

Deck Hardware includes the following:

- Full length, anodized aluminum gunnel rail
- Two jib sheet winches with one handle
- Custom designed stainless steel shroud chain plates
- Stainless steel jib tack fitting and bow plate
- Highly polished stainless steel bow pulpit
- Stainless steel lifeline bases and stanchions
- Vinyl-coated stainless steel lifelines
- Two stainless steel mooring cleats aft
- One large mooring cleat forward
- One jam cleat for main sheet
- Two jam cleats for jib sheet
- Stainless steel raise or lowering motor bracket
- Stainless steel backstay brackets

Hand Rails -- Two teak cabin-top hand rails.

Forward Hatch -- Full opening hatch provides light and ventilation in fore cabin and head.

Dodger -- Dacron shield for all-weather protection and full standing headroom in galley area.

Cockpit -- Roomy 6' self-bailing cockpit with large scuppers and seats with scuppers. Large locker under starboard seat is fitted with a clamping bracket for outboard motor stowage. Portside deep seat locker for gas can. Flush mount stern light.

V-berth Area -- Cushioned forward area sleeps two. Full 4" cushions. Stowage space in two compartments under bunks. Light on bulkhead. Rope locker.

Head Area -- Self-contained portable toilet. Sliding doors between V-berth and cabin areas for privacy. Large shelf on port side, clothes hanger on starboard side. Mirror and light on bulkhead.

Cabin Area -- Two full length settee berths. One easy-access quarter berth. Drop-leaf table serves four. Flush mounted alcohol stove. Sliding door compartments behind stove for stowage of cups, plates and utensils. Large non-corrosive sink, fresh water pump with water container. Compartments under sink for stowage of food and cookware. Large, removable ice chest. Recessed trash receptacle with lid. Cabin has spacious storage compartments under seats and two additional storage drawers built into steps. Translucent hatch provides pleasant interior lighting by day, lamp over galley and table for night use.

Electrical -- Twelve volt battery, shelf, fused electrical panel with individual control switches for interior lights, running lights, and electronics (if used). Standard running lights, four interior lights.
